

“ City of Springfield Specs - How we got here from there..”

Course Description

The City of Springfield Public Works Department are continually upgrading their delivery systems for sharing information with the public and construction industry. This presentation will cover what services the Department provides and the processes they use to share information and update their specifications.

Learning Objectives

- Understand what Public Works does and is responsible for.....a brief overview of what City of Springfield Public Works does to better understand why City Specs must be written to cover a wide variety of task.
- Brief history of the progression of the City Specifications and Standards. The City has made significant changes to their Specifications and will give background of how and why these changes have been made.
- Cover and outline the current City's online system for revising specifications. Including how they get feedback and suggestions from staff as well as the local contracting community.
- Review a few sections of changes made to the current specifications and cover the why and how they were revised from a technical standpoint.
